Athena 120

Fingerprint Time-Clock

Dimensions: 68x 27x 28 mm

Weight: Approximately 65g

A120 USB Fingerprint Time-Clock, the latest fingerprint recognition technology with employee identification.

Fingerprints Identification is more convenient and provides uniqueness. Management level can be sure of the correctness of information, since oneself is the only person to clock in or out for himself or herself. Executives won't have to worry there is a such situation that an individual punctures clock-in cards for others. And the attendance records are digitalized, which reduce the operation cost. All employees have to do is just press their fingers on the fingerprint reader and wait until the computer has verified the fingerprints, which won't take long.

A120 USB Fingerprint Time-Clock also provides terrific functions in Employee Identification, Backup Database, Recover Database, Setting Company's Information, Uninstall Bio-Timer and so on.

- Athena 120 USB Fingerprint Time-Clock Software Features:

1. Employee Identification

General users only have the authorization to switch time display systems and to report in. Management personnel not only have the same authorization as general users, but also have the authorization to add/modify/delete fingerprints account, to set the clock-in time, and to output/print out report sheets.

2. Backup Database

Bio-Timer's database contains fingerprint accounts and clock-in records. To avoid malfunction of the computer caused by unpredictable conditions, the software provides the function of backup to preserve clock-in records.

3. Recover Database

This function can recover backedup database, including fingerprints account, and clock-in records to Bio-Timer software.

4. Setting Company's Information

Users can set company name, telephone number, fax number, website, logo, department and title. If the company name is changed, the company name in the main screen of clock-in software will be changed simultaneously.

5. Report

Bio-Timer provides functions of exporting and printing clock-in records. To save the clock-in record displayed in the screen as an electronic file with the formats of *.txt and *.xls.

6. Uninstall Bio-Timer

The Bio-Timer provides an uninstallation function to uninstall the software from the OS. The user can run the uninstalled program from the "Start Menu/Programs/BioTimer/Unstall"
